

Edit plugin blueprint template

You can edit plugin template to request more information or adapt the content to your custom use.

Space administration permissions are required to change any existing template.

Blueprint templates can be changed by space. To do so, you need to access the "Space Tools" area within your space. Then go to "Content tools" panel.

Select the template you want to change and edit it (example below is related to Ideation template)

Ideation Blueprint	Promote · Disable
Idea template	Edit
Ideation index template	Edit

Editing a template is similar to editing a page. You can add macros, texts, and diverse content. Both blueprint page template and blueprint index page template can be modified.

 You can't change blueprint behavior after creation. Some blueprints land in edit mode and some others in view mode. Editing the template don't give you the ability to change this behavior.
